

Welcome to Science at Creative Beginnings Preschool! During this time each week your child will have the opportunity to discover the world around them through hands-on activities and literature. We will have a different unit each month, beginning with "Weather" in September, which seems very appropriate given our adventurous weather pattern over the past few weeks! We will talk about what weather is and the different kinds of weather we may experience. We will make it rain, and learn about the wind and rainbows. Please ask your child what they did in Science and when I see you in the drop-off line, let me know what he/she enjoyed the most!
